5 Liter Oxygen Concentrator OZ-5-01TW0

The OZ-5-01TW0 Oxygen Concentrator is designed to provide supplementary oxygen to patients who have been diagnosed with oxygen therapy. It delivers a high concentration of oxygen and is used with a cannula to channel oxygen from the concentratior to the patient.This device may be used at home or Institutions.

Mobiable

Four universal wheels for easy movement

Stable oxygen production

Applying with CECA molecular sieve

High Concentration

93% ± 3% high concentration

Multiple functions

It comes with oxygen concentration and nebulization functions

Product Details

Product Specifications

Dimensions	340mm*300mm*650mm
Weight	19kg
Flow Specifications	0 LPM-5 LPM
Oxygen Concentration	93%±3%(5L/min)
Oxygen output pressure	30~60kPa
Input Power	350VA
Sound	⩽45dB(A)
